

# Keep our Country free of Bird Flu

- Follow laid down procedures when operating import-export businesses in poultry and poultry products
- Only birds and poultry certified free of disease and those from disease free countries will be allowed into the country
- Seek and follow the advice of veterinary professionals
- Declare all the live birds, poultry, eggs and poultry products in your luggage
- Cooperate with the airport authorities to inspect your luggage

To protect the population, the Government will destroy birds and poultry products that do not have a sanitary inspection certificate
